

Siem Reap, Cambodia, **28th November 2018**

Dear **Benefactors and Friends.**

**\*\*\* The doors of the New Academic year 2018-19 are wide opened!**

Our students have all joined their respective schools. Today, all of them are in different learning processes, and all THANKS to the generosity of our Benefactors that make it possible through the Scholarship program.

**Academic Education in Cambodia is as below:**

- **Primary**, from course 1 to 6.
- **Secondary**, from course 7 to 9. At the end of the secondary level, students must undergo an exam by the Ministry of Education.
- **High School**, from course 10 to 12. At the end of the 12th year, students must pass the university entrance exam.
- **University and Technical School**.

**We currently have students in all of these levels.**

## There are a variety of Schools that our Students attend

We attend public and private schools, depending on the academic results or the level of commitment. We also have a program of Scholarships in country side villages, students continue to live with their families, without the need for family detachment until reaching technical or university level courses.

Above images, students residing in DEI KOMA-The Children's Land.

Below image, two sister supported in their education and who reside with their family.

Students attending **WESTERN INTERNATIONAL SCHOOL**

Our students who want to learn a skill, attend **Technical Schools**.

And finally, students that attend **Universities** are the ones who have shown seriousness throughout their educational trajectory, who understand the level of commitment required of them and who know and respect the scholarships that they receive from our Benefactors.

Looking at present towards the future we are preparing ourselves in: **Teacher for Higher Secondary School, Psychology and International Relations.**

## JAVI SCHOOL (JS)

**It is our school; the educational center located in DEI KOMA-The Children's Land.**

Here we teach from **Nursery to Grade Four**. It is a great way for the most little ones to adapt easily to educational programs, without having to leave home. On the other hand, children and young people who have never attended school or are beginning and come to reside in DEI KOMA could be bullied at schools, even by teachers who lack the preparation to understand the situation of a 12 year old child or a 16 year old young person, who have never attended school. In **JAVI SCHOOL** they are safe and no one makes fun of them, being able to start the first courses with enthusiasm. Another case is children with learning problems, in our school they are treated according to the level they can follow and not the established models that do not serve them; classes are adapted to their pace and capacity.

**At 7 in the morning, classes begin at JAVI School. The flag is raised and the national anthem is sung.**

Very HAPPY the studnets in Grade Four.

In addition, at **JAVI SCHOOL** we teach English and Computer classes every day, which are compulsory for all; and three times a week, Spanish classes, for those who want to learn a widespread second foreign language. All this is developed with highly qualified local and foreigner teachers who enjoy their work.

In the image the Spanish teache sharing her knowledge to some of her students.

**Thanks** to the **Scholarship Program**, it is possible to support the educational system of our organization, where we look for the best for the student and its possibilities.

Prices vary depending on whether the school is public or private.

**Public from \$ 100 to \$ 450 per year.** Depending on the grade.

**Private from \$ 450 to \$ 1,400 per year.** Depending on the grade.

In all cases students receive academic material, uniforms, backpacks, shoes, bikes, etc. The big difference in prices is due to the administrative and academic fees that are paid in private school that do not exist in public schools.

Many **THANKS** to our **BENEFACtors** of the **Scholarship Program**.

At present they are **pending to sponsor 4 children who study primary between the second and fifth grades**. For those people who can help us, please contact me through email, Facebook or whatsapp, they **will change the life of a child**, they can follow him throughout his academic life and **feel the transformation that occurs both in the child and in each one of us.**

**THANK YOU!.**
